About IDS

Introduction

IDS is a gas detector manufacturing facility established in 2025 at MODON 2, Kingdom of Saudi Arabia, supporting Saudi Vision 2030.

In partnership with **Teledyne Gas & Flame Detection**, IDS KSA provides **high-quality gas detection systems and controllers** for monitoring **flammable gases, toxic gases, and oxygen levels**. Our products combine Teledyne's trusted sensor technology with IDS's localized manufacturing and technical support.

Designed for demanding industries such as **oil & gas, petrochemicals, utilities, mining, and fertilizers**, IDS gas detection solutions deliver **accurate, reliable, and stable performance**, even in harsh and hazardous environments. We focus on **safety, compliance, and long-term operational reliability**, meeting the needs of critical industrial applications in Saudi Arabia.

Technology Partner

Teledyne Gas & Flame Detection is a global leader in **industrial gas detection and flame monitoring technologies**, with decades of experience delivering reliable safety solutions to critical industries worldwide. Their product portfolio includes advanced **flammable, toxic, and oxygen gas detectors, flame detectors, controllers, and monitoring systems**, designed to meet the highest international safety standards.

As IDS's technology partner, Teledyne provides **proven sensor technology, engineering expertise, and continuous innovation**, ensuring that IDS products meet global performance, accuracy, and certification requirements. This partnership enables IDS to offer **world-class gas detection solutions** with the added advantage of **local manufacturing, faster delivery, and dedicated technical support** within Saudi Arabia.

Vision & Mission

Vision

To be the **leading provider of locally manufactured gas detection solutions** in Saudi Arabia, delivering world-class safety, reliability, and innovation to critical industrial sectors while supporting the Kingdom's industrial growth and localization objectives.(IKTVA,Vision 2030)

Mission

To **manufacture and deliver reliable and certified gas detection systems and controllers** that ensure safety in industrial environments. Through innovation, advanced technology partnership with Teledyne GFD, and localized support, we aim to provide **accurate, durable, and user-friendly solutions** that protect people, assets, and operations across oil & gas, petrochemical, utilities, mining, and other high-risk industries.

Core Values

- Safety
- Quality
- Innovation
- Reliability
- Local Support

Localization & Saudi Content

- Made in KSA
- IKTVA Contribution (Under process, Request number 5377)
- Local Workforce Development
- Local Repair & Maintenance Center

02

IDS Products

Product Portfolio

Fixed Gas Detectors

- LEL (Applied for 9 COM)
- IR LEL (Applied for 9 COM)
- ELECTROCHEMICAL
- VOC
- Open path

Portable Gas Detectors Wireless / Smart Detectors

Technology & Features

- Sensor type (IR, catalytic bead, electrochemical, semiconductor)
- Explosion-proof housing
- Digital communication: 4–20mA, HART, Modbus
- Self-diagnostics
- Fail-safe operation

Applications

- Oil & Gas
- Petrochemical
- Refineries
- Fertilizers
- Food & Beverage
- Steel & Mining
- Pulp & Paper
- Utilities

Features

- **Failsafe User-Friendly Interface**
 - LED Display (With Antiglare Cover)
 - Full Text Display Method
 - Non-intrusive Interface
 - Auto Zero/Auto Span
 - Pre-emptive Fault Diagnostics
- **Environmentally Bulletproof**
 - Electropolished 316SS Construction
 - 100% Epoxy Encapsulated Circuitry
 - Bulletproof I/O Protection
 - Water-proof, Corrosion-Proof, Vibration-Proof
- **Modular & Serviceable**
 - Modular Design
 - Plug and Play Components
 - Quick Thread Release Sensor Endcap (Allen Wrench only required)
 - Integral Calibration Port

FP-LEL – Combustible Gas Sensor

Description

FP-LEL is a non-intrusive “Smart” sensor designed to detect and monitor combustible gases in air over the range of 0-100% LEL using catalytic bead sensor technology. The plug-in, field replaceable detector is poison-resistant and features oversized gold-plated connections that help prevent corrosion. The FP-LEL’s rugged framework includes an electro-polished

IR-LEL – Combustible Gas Sensor

Description

Model IR-LEL is a non-intrusive “Smart” sensor designed to detect and monitor combustible hydrocarbon gases in air over the range of 0-100% LEL using miniature non-dispersive Infrared Optical (NDIR) sensor technology. As compared to catalytic bead sensors, with NDIR there is no risk of sensor poisoning, no risk of high concentration saturation, and no need for O₂ to be present.

Main Products of IDS

FP-LEL

IDS Services

IDS Services

IDS provides a full range of field service solutions designed to maintain the accuracy, safety, and long-term reliability of gas detection systems. Our service team is trained to support customers throughout the entire lifecycle of their installed systems. It includes

- On-Site Services
- In-House Service
- Repair & Restoration
- Online Technical Support
- Calibration services

IDS Services

On-Site Services

- **Installation, commissioning, and start-up support**
- **Predicted Maintenance and inspection**
- **On-site calibration and functional testing**
- **Troubleshooting, diagnostics, and system optimization**
- **Emergency response for critical operational issues**

IDS Services

In-House Service

- **Factory repair and refurbishment of detectors and controllers**
- **Sensor replacement, recalibration, and performance verification**
- **Firmware updates, configuration checks, and full functional testing**
- **Use of genuine parts and certified testing procedures**
- **Detailed service reports and documentation**

IDS Services

Repair & Restoration

- **Component-level repair for extended equipment life**
- **Restoration of failed or underperforming devices**
- **Final quality checks to ensure compliance with industry standards**
- **Rapid turnaround to reduce downtime**

IDS Services

Repair & Restoration

- **Component-level repair for extended equipment life**
- **Restoration of failed or underperforming devices**
- **Final quality checks to ensure compliance with industry standards**
- **Rapid turnaround to reduce downtime**

IDS Services

Online Technical Support

- Remote troubleshooting and issue assessment
- Real-time guidance for site technicians
- Online consultation for installation, configuration, and system design
- Support for service scheduling and spare-parts identification

IDS Services

Calibration services

IDS operates its own dedicated calibration laboratory, enabling precise, compliant, and timely calibration of gas detectors. Our facility is equipped with certified calibration gases, advanced test benches, and industry-standard instrumentation.

- **Local laboratory in KSA**
- **Reduced downtime and faster service**
- **Compliance with international standards**
- **Enhanced reliability and measurement accuracy**

Our Service Commitment

- **Online Technical Support**
- **Certified and trained technicians**
- **High-quality repair standards**
- **Continued support throughout the product lifecycle**

Teledyne Gas & Flame Detection is expanding its presence in the Middle East through a strategic partnership with **Industrial Detection Solutions (IDS)**.

Together, we are establishing a new, state-of-the-art 699 m² manufacturing facility in Dammam, Kingdom of Saudi Arabia (KSA). This facility will enhance local production capabilities, improve delivery lead times, and strengthen regional support for advanced gas detection solutions.

Calibration Lab

- Calibration of flammable, toxic, and oxygen gas detectors
- Certified calibration gases and traceable standards
- Multi-point calibration and accuracy verification
- Sensor performance testing and drift analysis
- Calibration certificates issued for all serviced units
- Fast turnaround with local availability

699 M²

A Destination for Gas Detection
